ABOUT

Fullstack Engineer with 2+ years of hands-on experience across the stack in fintech and digital banking, building responsive, user-centric interfaces with React.js and Next.js while developing backend REST APIs with Java and Spring Boot, backed by both SQL and NoSQL databases. Skilled at translating complex Figma designs into pixel-perfect, accessible frontends while owning the services and data layer that power them. Brings additional strength in requirements scoping, stakeholder communication, and cross-functional leadership, sharpened by leading a five-person team to deliver a working product concept at the Nomba Hackathon. Combines a Business Administration foundation with technical expertise across the stack to deliver clean, maintainable code that aligns technical execution with business goals.

WORK

Junior Fullstack Engineer | Condueet Technology

Mar 2025 - Present, Remote, Lagos, Nigeria

Partners cross-functionally with designers, backend engineers, QA, and stakeholders to deliver end-to-end frontend and backend features for client-facing fintech and digital products, translating Figma designs and business requirements into scalable, accessible, production-ready code across the stack.

- Develops and maintains scalable, responsive web applications using React.js, Next.js, HTML5, CSS3, and JavaScript.
- Designs and builds RESTful APIs with Java and Spring Boot, backed by SQL and NoSQL databases, to support client-facing features.
- Translates Figma and UI/UX designs into pixel-perfect, accessible interfaces, working directly with designers to resolve edge cases and refine handoff.
- Scopes and prioritizes feature work, bug fixes, and usability improvements across multiple client projects, balancing technical constraints with business needs.
- Optimizes performance through code splitting, lazy loading, and memoization on the frontend, and efficient query and data handling on the backend.
- Builds and maintains reusable UI components and design-system consistency across multiple client products.
- Participates in Agile ceremonies - sprint planning, daily stand-ups, and retrospectives - helping shape what gets built and when.
- Troubleshoots production issues across the stack and communicates directly with clients and stakeholders on requirements and progress.

Junior Fullstack Engineer | Kay Vee MicroFinance Bank

Jan 2021 - Dec 2021, Remote, Lagos, Nigeria

Collaborated with UI/UX designers and product managers to deliver full-stack, user-centric digital banking experiences across Loans, Savings, Current Accounts, Fixed Deposits, and SME products.

- Built and consumed RESTful APIs with Java and Spring Boot to serve dynamic financial data and customer-facing content, using SQL and NoSQL databases for storage.
- Helped define requirements for customer-facing banking features, working from business needs through to shipped functionality.
- Built reusable, validated forms to improve data accuracy and reduce customer submission errors.
- Implemented SEO best practices and resolved cross-browser compatibility issues across Chrome, Firefox, Safari, and Edge.
- Tested and debugged frontend and backend features, and assisted in deploying website and API updates to staging and production.

Junior Fullstack Engineer (Intern) | Bowen MicroFinance Bank

May 2020 – Nov 2020, Onsite, Lagos, Nigeria

Designed and built full-stack features for customer onboarding, account opening, and KYC workflows, partnering with UI/UX designers and backend engineers.

- Built and integrated secure RESTful APIs with Java and Spring Boot for account information, transactions, and customer notifications, using SQL and NoSQL databases.
- Developed reusable React components, transforming Figma designs into responsive, pixel-perfect interfaces.
- Implemented client-side validation, error handling, and accessibility improvements (WCAG) to improve data accuracy and usability.
- Documented reusable components, API endpoints, and development standards to improve team productivity and onboarding.
- Conducted cross-browser and cross-device testing, and supported production deployments across staging and live environments.

PROJECTS

Sound Wave – Music Streaming App | Figma

Designed the end-to-end UI/UX for a Spotify-style music streaming app, covering onboarding, sign-in/sign-up, home dashboard, and library screens, with a cohesive dark-theme visual system and reusable UI components (players, cards, buttons).

Afribuy – E-commerce Website | Figma – Deployed

Designed the complete UI/UX for Afribuy, an e-commerce platform, from initial wireframes through final visual design, taking it from concept to a live, deployed product.

LEADERSHIP

Team Lead | Nomba Hackathon

Led a five-person cross-functional team through the full product cycle – ideation, scoping, delivery, and presentation – defining the product concept, prioritizing features against a fixed deadline, and presenting the final product to judges.

EDUCATION

Bachelor of Science in Business Administration | Bestower International University

Lagos, Nigeria, Jan 2022 – Feb 2025

SKILLS

Languages | JavaScript (ES6+), Java, SQL, HTML5, CSS3

Frameworks/Libraries | React.js, Next.js, Spring Boot, Tailwind CSS, Material UI, Bootstrap

Databases | MySQL, PostgreSQL, MongoDB

Cloud & Tools | Git, GitHub, GitHub Actions, Vite, Webpack, npm, Postman, Figma

Testing & QA | Jest, React Testing Library, Cypress, Storybook

Design | Wireframing, Prototyping, User Flows, Responsive & Mobile-First Design, Design Systems, Component Libraries, Accessibility (WCAG)

Product Management | Requirements Gathering, Feature Scoping, User Stories, Backlog Refinement, Sprint Planning, Stakeholder Management, Notion

Practices | Agile/Scrum, REST API Design & Development, Authentication & Authorization, CI/CD

LANGUAGES

English
