

ADEYEMI OLALEKAN ABIDEMI

Fullstack Engineer — React / Next.js / Java (Spring Boot)

Lagos, Nigeria | +234 810 020 3575 | olalekanabidemi905@gmail.com

Portfolio: software-portfolio-plum.vercel.app

PROFESSIONAL SUMMARY

Fullstack Engineer with hands-on experience across the stack in fintech and digital banking: building responsive, user-centric interfaces with React.js and Next.js, and developing backend REST APIs with Java and Spring Boot, backed by both SQL and NoSQL databases. Skilled at translating complex Figma designs into pixel-perfect frontends while also owning the services and data layer that power them. Combines a foundational background in Business Administration with technical expertise across the stack to deliver clean, maintainable code that aligns technical execution with business goals. A live portfolio of shipped work is available at software-portfolio-plum.vercel.app.

CORE SKILLS

- Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3 (Flexbox, Grid), Tailwind CSS, Material UI, Bootstrap, Sass
- Backend: Java, Spring Boot, RESTful API Design & Development, Authentication & Authorization, Service Integration
- Databases: SQL (MySQL/PostgreSQL), NoSQL (MongoDB)
- Frontend Architecture: Responsive Web Design, Component-Based Architecture, State Management, Form Handling & Client-Side Validation
- Testing & Documentation: Jest, React Testing Library, Cypress, Storybook, Postman
- Build Tools & DevOps: Vite, Webpack, npm, Git, GitHub, GitHub Actions

PROFESSIONAL EXPERIENCE

Junior Fullstack Engineer | *Condueet Technology*

March 2025 – Present

- Collaborate with cross-functional teams to deliver end-to-end frontend and backend solutions tailored to client requirements and business objectives.
- Develop and maintain scalable, responsive web applications using React.js, Next.js, HTML5, CSS3, and JavaScript.
- Design and build RESTful APIs with Java and Spring Boot, backed by SQL and NoSQL databases, to support client-facing features.
- Translate Figma and UI/UX designs into pixel-perfect, accessible, and responsive user interfaces.
- Integrate frontend applications with internally-built and third-party RESTful APIs, optimizing data handling for improved performance and reliability.
- Customize and enhance existing client applications by implementing new features, fixing bugs, and improving usability across the stack.
- Optimize application performance through code splitting, lazy loading, memoization, and efficient state management on the frontend, and efficient query and data handling on the backend.
- Build reusable UI components and maintain consistent design systems across multiple client projects.
- Work closely with QA engineers to identify, reproduce, and resolve defects before production deployment.
- Participate in Agile ceremonies, including sprint planning, daily stand-ups, retrospectives, and backlog refinement.
- Use Git and GitHub for version control, code reviews, branching strategies, and collaborative development.
- Ensure applications meet accessibility (WCAG) standards and deliver consistent experiences across modern browsers and devices.
- Troubleshoot production issues across the stack, analyze root causes, and implement timely fixes to minimize downtime.
- Write clean, maintainable, and well-documented code following industry best practices and coding standards.
- Support deployment processes and collaborate with DevOps teams to ensure smooth releases.
- Communicate directly with clients and stakeholders to clarify requirements, provide project updates, and incorporate feedback into development.

Junior Fullstack Engineer | *Kay Vee MicroFinance Bank*

Jan 2021 – Dec 2021

- Collaborated with UI/UX designers and product managers to deliver user-centric digital banking experiences.
- Developed responsive pages for banking products, including Loans, Savings, Current Accounts, Fixed Deposits, and SME services.
- Built and consumed RESTful APIs with Java and Spring Boot to serve dynamic financial data, product information, and customer-facing content, using SQL and NoSQL databases for storage.
- Built reusable forms with client-side validation to improve data accuracy and reduce submission errors.
- Maintained consistent branding and design standards across all customer-facing web pages.
- Implemented SEO best practices, including semantic HTML, metadata optimization, and structured page layouts.
- Resolved cross-browser compatibility issues to ensure a consistent experience across Chrome, Firefox, Safari, and Edge.
- Collaborated with backend engineers to troubleshoot API integration issues and improve application reliability.
- Optimized images, fonts, and static assets to improve page speed and overall user experience.
- Participated in Agile sprint planning, daily stand-ups, code reviews, and feature demonstrations.
- Managed source code using Git and collaborated through GitHub pull requests and code reviews.
- Tested and debugged frontend and backend features to ensure quality before deployment to production.
- Monitored and fixed bugs reported by stakeholders and end users, improving usability and customer satisfaction.
- Assisted in deploying website and API updates and verifying successful releases in staging and production environments.

Junior Fullstack Engineer (Intern) | Bowen MicroFinance Bank

May 2020 – Nov 2020

- Designed and implemented responsive interfaces for customer onboarding, account opening, and KYC workflows.
- Developed reusable React components to ensure consistency across banking portals and internal dashboards.
- Built and integrated secure RESTful APIs with Java and Spring Boot for account information, transactions, and customer notifications, using SQL and NoSQL databases.
- Implemented client-side form validation and error handling to improve data accuracy and user experience.
- Optimized application performance through lazy loading, code splitting, and asset optimization to improve page speed.
- Improved accessibility by following WCAG guidelines and semantic HTML best practices.
- Worked closely with UI/UX designers to transform Figma designs into responsive, pixel-perfect interfaces.
- Maintained consistent branding and design systems across multiple banking products and landing pages.
- Participated in Agile sprint planning, daily stand-ups, sprint reviews, and retrospectives.
- Identified and resolved frontend and backend bugs, ensuring stable releases and improved application reliability.
- Conducted cross-browser and cross-device testing to ensure a seamless experience across desktop, tablet, and mobile platforms.
- Collaborated with QA engineers during feature testing and regression testing before production deployments.
- Assisted in maintaining secure authentication flows and protected customer-facing routes.
- Documented reusable components, API endpoints, and frontend development standards to improve team productivity.
- Monitored application performance and implemented improvements based on stakeholder and user feedback.
- Supported production deployments and verified successful releases in staging and live environments.

EDUCATION

Bachelor of Science in Business Administration

Bestower International University | Jan 2022 – Feb 2025
