

ADEYEMI OLALEKAN ABIDEMI

Product Manager

Lagos, Nigeria | +234 810 020 3575 | olalekanabidemi905@gmail.com

Portfolio: software-portfolio-plum.vercel.app

PROFESSIONAL SUMMARY

Product-minded professional with a hands-on engineering background in fintech and digital banking, bringing a rare combination of technical fluency and cross-functional leadership to product management. Experienced working directly with designers, engineers, and QA to scope features, translate business requirements into technical specifications, and ship user-centric digital banking products end-to-end. Led a five-person team to deliver a working product concept at the Nomba Hackathon, managing scope, roles, and stakeholder presentation under time pressure. Combines a Business Administration foundation with real engineering experience to bridge the gap between business goals, user needs, and technical execution. A live portfolio of shipped products is available at software-portfolio-plum.vercel.app.

CORE SKILLS

- **Product Management:** Requirements gathering, feature scoping, user stories, backlog refinement, sprint planning, Agile/Scrum ceremonies, cross-functional team leadership
- **Stakeholder & Client Management:** Requirements clarification, project updates, feedback incorporation, client and stakeholder communication
- **Design Collaboration:** Translating Figma/UI-UX designs into product requirements, maintaining design system consistency, accessibility (WCAG) standards
- **Technical Fluency:** React.js, Next.js, Java/Spring Boot, RESTful APIs, SQL & NoSQL databases, Git/GitHub, CI/CD — enables credible collaboration with engineering teams
- **Quality & Delivery:** QA collaboration, bug triage and prioritization, release coordination, production issue troubleshooting
- **Tools:** Figma, Postman, Jira-style Agile workflows, GitHub, GitHub Actions, Storybook

LEADERSHIP EXPERIENCE

Team Lead | *Nomba Hackathon*

- Led a five-person cross-functional team through the full product cycle at the Nomba Hackathon, from ideation and scoping to final delivery and presentation.
- Defined the product concept and prioritized features against a fixed deadline, making trade-off calls to keep the team focused on a shippable scope.
- Assigned roles and coordinated workstreams across teammates, running quick syncs to track progress and unblock issues in real time.
- Represented the team in presenting the final product to judges, translating technical work into a clear business and user value narrative.
- Gained first-hand experience in the core responsibilities of product management: scoping, prioritization, stakeholder communication, and team leadership under constraints.

PROFESSIONAL EXPERIENCE

Junior Fullstack Engineer | *Conduet Technology*

March 2025 – Present

- Partner with cross-functional teams — designers, backend engineers, and QA — to deliver end-to-end product features aligned to client requirements and business objectives.
- Work directly with clients and stakeholders to clarify requirements, provide project updates, and incorporate feedback into the product roadmap.
- Translate Figma and UI/UX designs into accessible, production-ready features, ensuring the delivered product matches the intended user experience.
- Scope and prioritize feature work, bug fixes, and usability improvements across multiple client projects, balancing technical constraints with business needs.

- Participate in Agile ceremonies — sprint planning, daily stand-ups, retrospectives, and backlog refinement — helping shape what gets built and when.
- Collaborate with QA engineers to identify, reproduce, and resolve defects before production release, protecting product quality.
- Build and maintain reusable UI components and design-system consistency across multiple client products.
- Support release planning and coordinate with DevOps to ensure smooth, low-risk deployments.

Junior Fullstack Engineer | *Kay Vee MicroFinance Bank*

Jan 2021 – Dec 2021

- Collaborated closely with UI/UX designers and product managers to deliver user-centric digital banking experiences across Loans, Savings, Current Accounts, Fixed Deposits, and SME products.
- Helped define requirements for customer-facing banking features, working from business needs through to shipped functionality.
- Built reusable, validated forms to improve data accuracy and reduce customer submission errors — a direct product-quality improvement.
- Maintained brand and design consistency across all customer-facing digital banking products.
- Partnered with backend engineers to troubleshoot integration issues and improve overall product reliability.
- Took part in Agile sprint planning, stand-ups, code reviews, and feature demos, contributing to product decisions throughout the cycle.
- Monitored and triaged bugs reported by stakeholders and end users, prioritizing fixes that most improved customer satisfaction.

Junior Fullstack Engineer (Intern) | *Bowen MicroFinance Bank*

May 2020 – Nov 2020

- Designed and helped scope customer onboarding, account opening, and KYC workflows end-to-end, working closely with UI/UX designers.
- Built and integrated features for account information, transactions, and customer notifications across a multi-product banking portal.
- Improved usability and accessibility (WCAG) across banking products based on stakeholder and user feedback.
- Documented reusable components, API endpoints, and development standards to improve team productivity and onboarding.
- Took part in Agile sprint planning, reviews, and retrospectives, contributing to prioritization discussions.
- Supported production releases and verified successful rollout in staging and live environments.

EDUCATION

Bachelor of Science in Business Administration

Bestower International University | Jan 2022 – Feb 2025
